

With the increasing demand for internet access in educational campuses due to evolving standard of education and flexibility offered by the Internet - universities, colleges, educational institutes etc. are keenly stepping forward to setup secured and stable wired or Wi-Fi network campus for their students. As the world is transforming completely into digital space, the institution is committed to its mission of using modern technology for ensuring overall effectiveness of its services to all the stakeholders. The college has adopted the strategy of creation and enhancement of its ICT infrastructure which is continuously upgraded with the latest computing facilities. Technology is that element of development which is almost found in every part of our culture, affecting how we live, play, work and learn. The need for Internet has become mandatory in information sharing and knowledge dissemination. Most of the official work is being done with the help of ICT. The institution has undergone significant technological advancements with the integration of diverse ICT facilities such as LCD projectors and Wi-Fi. The institution has a 24X7 Wi-Fi facility in the college campus to avail internet connection at any place in the college. The present wired and wireless network infrastructure has been established with priority on reliability, performance and efficiency. CCTVs are also installed in the college campus.

**Here are some glimpses -**
